

# ACTION PLAN

REGION E

PHARMACEUTICALS

2016 - 2018

Swedish regions and county councils

## GENERAL INFORMATION

### REGIONAL COORDINATOR

Anders Olsson, Västra Götalandsregionen

### CONTACT PERSONS

Anders Olsson, Västra Götalandsregionen

### PRODUCTS IN FOCUS

➤ Prescription drugs, focus antibiotics

### VISION

The Swedish Regions and county councils are responsible for providing healthcare, dental care and public transportation to all citizens. It is important for us to conduct our business so that it contributes to sustainable development. Therefore, we want to ensure that the products and services we procure are manufactured under responsible and sustainable conditions.

### DEV. GOALS

3, 6, 12, 14, 16, 17

# SUPPLY CHAIN

Generic supply chain

Product

Raw material

Raw material, API

Other sub-suppliers

Manufacturing of API

Additives

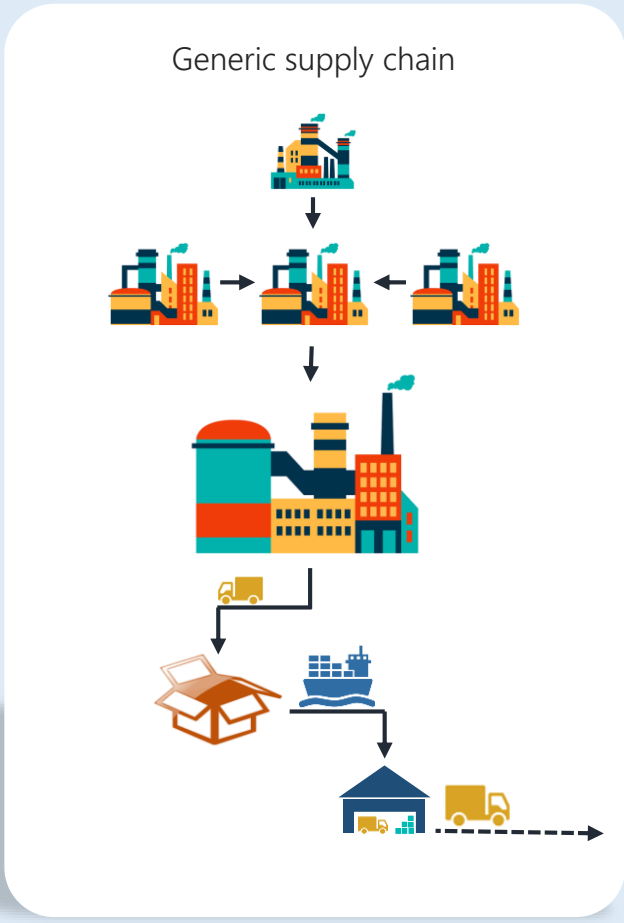

Final assembly

Pharmaceuticals

Packaging/distribution

Packaging

Packaging, warehousing

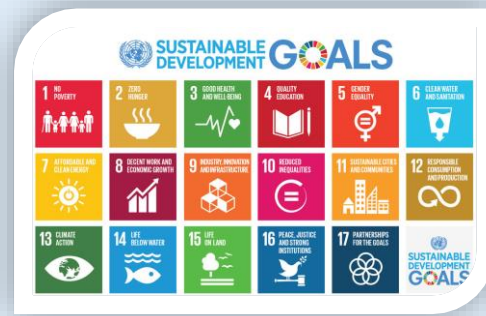

## PRIORITIZED RISK

GENERIC SUPPLY CHAIN ∨	HUMAN RIGHTS	LABOR RIGHTS	ENVIRONMENT	ANTI-CORRUPTION
RAW MATERIAL	Right to land Right to water Right to health (spread of resistant bacteria)	Health & Safety: Adequate safety equipment for workers/exposure to hazardous substances	Discharge of API from factory into the environment	The Pharmaceuticals & Healthcare sector is perceived as a high-risk sector for corruption. For more information, visit: <a href="http://www.transparency.org.uk/our-work/pharmaceuticals-healthcare-programme/">http://www.transparency.org.uk/our-work/pharmaceuticals-healthcare-programme/</a>
OTHER SUB-SUPPLIERS				
FINAL ASSEMBLY				
PACKAGING/ DISTRIBUTION				

# GOALS

## HUMAN RIGHTS

Minimize spread of antibiotics resistance: ensure health, clean water, protect biodiversity, by reducing waste discharges from pharmaceutical industries into the environment

## LABOR RIGHTS

Ensure worker safety: ensure workers are not exposed to hazardous substances and environments and are offered adequate safety equipment

## ENVIRONMENT

Minimize wastewater discharge into environment for example by developing standard limits, and exploring the opportunity to impose requirements on standard limits in public procurement. Also through stakeholder dialogues and follow-ups

## ANTI-CORRUPTION

Address challenge of corruption in pharma industry: investigate/map to what extent corruption contributes to wastewater being discharged into the environment in certain countries. As far as possible address challenge through stakeholder dialogues, follow-ups and other activities.

## ACTIVITY FOCUS

Year 1

Focus on stakeholder dialogues with industry associations, transparency in the supply chain, and monitoring.

Year 2

Focus on stakeholder dialogues with industry associations, transparency in the supply chain, as well as follow-up. Reach out to nationally prioritized suppliers and carry out office audits. Implementation of factory audits. Development of drug criteria in collaboration with the procurement authority.

Year 3

Focus on stakeholder dialogues with industry associations, transparency in the supply chain, as well as auditing. Reach out to nationally prioritized suppliers and carry out desktop audits. Development of award criteria in collaboration with the national agency for public procurement.
